06:00	09:00	12:00	15:00	18:00	21:00
Heavy Rain	Fog	Sunny intervals	Sunny intervals	Cloudy	Sunny intervals
Precipitation probability					
80%	20%	20%	10%	10%	<05%

Forecast for Monday 27 Jun 2022

Weather: A generally wet morning as an area of rain moves east across the Brecon Beacons, heavy at times. Perhaps turning showery on the back edge, with a low risk of thunderstorms late morning. Conditions improving from the west by late morning with sunny intervals and a low risk of the odd shower. High cloud may turn sunshine hazy at times.

Chance of cloud-free hill tops above 600m: 30% initially, gradually becoming above 95% from the west as rain clears.

Low cloud and visibility: Widespread banks of low cloud covering slopes down to around 500m, particularly across western facing slopes and in heavy or persistent rain. Visibility poor in heavy rain or showers, improving to become very good away from any localised deteriorations in isolated afternoon showers.

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

West facing slopes seeing the poorest conditions this morning with paths becoming widely slippery underfoot. Conditions will be much improved for walking by the afternoon, however, adequate sun protection is advised given high UV levels, particularly on summits.

Recent rainfall: measured at Neuadd: altitude 353m

Recorded at	Last 24 hours:	Last 48 hours:	Last 72 hours:
02:00 on Mon 27 Jun 2022	4.8mm	9.4mm	13.8mm

Forecast for Tuesday 28 Jun 2022

Weather: A cloudy but dry morning. Turning wet and windy by the afternoon as a slow moving area of rain arrives from the west, heavy and persistent at times, particularly across western facing slopes. Rain turning showery by late afternoon, before fragmenting, becoming lighter and patchier by the evening.

Maximum wind: Southerly 30-40mph with gusts of 50-55mph, easing late on.

Chance of cloud-free hill tops 600m: Above 80%, becoming 20% during the afternoon. Improving to 60% from the west during the evening.

Low cloud and visibility: Cloud bases clear of the summits during the morning, lowering from the west as rain approaches. Extensive cloud bases obscuring routes above around 400m, with patches of cloud down to lower slopes, particularly west facing slopes. Very good visibility at first, deteriorating to poor in rain or showers.

Temperature: **Valleys:** Plus 11 Celsius becoming Plus 17 Celsius.
At 600m: Plus 9 Celsius.
Freezing level: Above the summits.
